MINI SENT

A green printed circuit board (PCB) with a grid of holes. It features four large circular mounting holes at the corners, each with a yellow ring. A central horizontal strip of components is visible, including a small black integrated circuit (IC) and several resistors. The board is populated with numerous small, light-colored components, likely resistors, arranged in a grid pattern. The text "This side was intentionally left blank." is printed in white on the board.

This side was intentionally left blank.
